

ReactJS Hands on Lab – 3

Creating React project named scorecalculatorapp

```
PS C:\Users\shari\OneDrive\Desktop\Digital-Nurture-JavaSE-main\ReactJS_HOI_Working_Directory> npx create-react-app scorecalculatorapp

Run "npm audit" for details.

Success! Created scorecalculatorapp at C:\Users\shari\OneDrive\Desktop\Digital-Nurture-JavaSE-main\ReactJS_HOI_Working_Directory\scorecalculatorapp
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

  npm run build
    Bundles the app into static files for production.

  npm test
    Starts the test runner.

  npm run eject
    Removes this tool and copies build dependencies, configuration files
    and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:
```

Created CalculateScore.js and mystyle.css

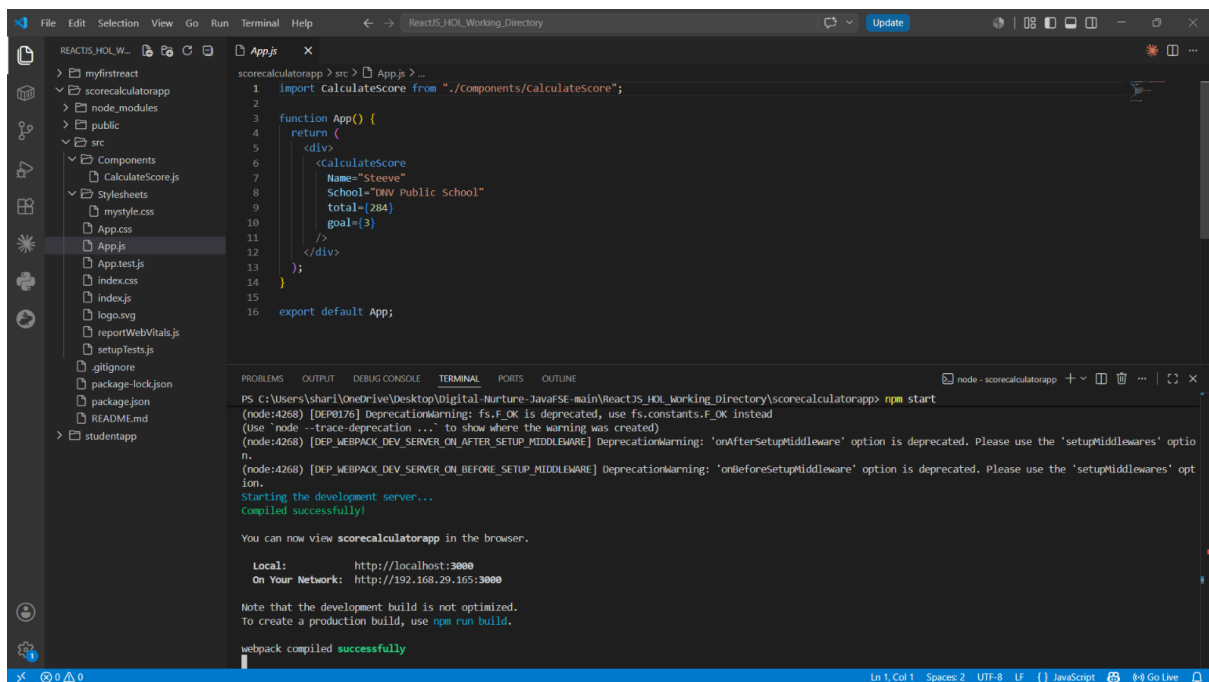

```
CalculateScore.js
1 import CalculateScore from './components/CalculateScore';
2
3 function App() {
4   return (
5     <div>
6       <CalculateScore
7         Name="Steve"
8         School="DWM Public School"
9         total={284}
10        goal={3}
11      />
12    </div>
13  );
14 }
15
16 export default App;
```

```
mystyle.css
1 .Name{
2   font-weight:300;
3   color:blue;
4 }
5
6 .School{
7   color:lightcoral;
8 }
9
10 .Total{
11   color:darkmagenta;
12 }
13
14 .Score{
15   color:forestgreen;
16 }
17
18 .formatstyle{
19   text-align:center;
20   font-size:large;
21 }
```

```
CalculateScore.js
1 import './stylesheets/mystyle.css';
2
3 const percentToDecimal = (decimal) => {
4   return (decimal * 100).toFixed(2) + "%";
5 };
6
7 const calcScore = (total, goal) => {
8   return percentToDecimal(total / (goal * 100));
9 };
10
11 function CalculateScore({ Name, School, total, goal }) {
12   return (
13     <div className="formatstyle">
14       <h1 style={{ color: "brown" }}>Student Details</h1>
15
16       <div className="Name">
17         <b>Name: </b>
18         {Name}
19       </div>
20
21       <div className="School">
22         <b>School: </b>
23         {School}
24       </div>
25
26       <div className="Total">
27         <b>Total: </b>
28         {total} Marks
29       </div>
30
31       <div className="Score">
32         <b>Score: </b>
```

Starting the development Server

The screenshot shows the Visual Studio Code editor with a project named 'scorecalculatorapp'. The file explorer on the left shows the project structure, including 'src', 'components', and 'stylesheets'. The main editor displays the 'App.js' file, which contains the following code:

```
1 import CalculateScore from './components/CalculateScore';
2
3 function App() {
4   return (
5     <div>
6       <CalculateScore
7         Name="Steeve"
8         School="DNV Public School"
9         total=(284)
10        goal=(3)
11      />
12    </div>
13  );
14 }
15
16 export default App;
```

The terminal at the bottom shows the command 'npm start' being executed. The output indicates that the development server is starting successfully and provides the following information:

```
PS c:\Users\shari\OneDrive\Desktop\Digital-Nurture-JavaSE-main\ReactJS_HOL_working_Directory\scorecalculatorapp> npm start
(node:4268) [DEP0176] DeprecationWarning: fs.F_OK is deprecated, use fs.constants.F_OK instead
(Use 'node --trace-deprecation ...' to show where the warning was created)
(node:4268) [DEP_WEBPACK_DEV_SERVER_ON_AFTER_SETUP_MIDDLEWARE] DeprecationWarning: 'onAfterSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
(node:4268) [DEP_WEBPACK_DEV_SERVER_ON_BEFORE_SETUP_MIDDLEWARE] DeprecationWarning: 'onBeforeSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
Starting the development server...
Compiled successfully!

You can now view scorecalculatorapp in the browser.

  Local:            http://localhost:3000
  On Your Network:  http://192.168.29.165:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
```
