

Extracted the cohortstracker.zip and restored the packages

The screenshot displays a Windows development environment. On the left, a file explorer shows the directory structure of a project named 'cohorttracker'. The project is located at 'C:\Users\shari\OneDrive\Desktop\Digital-Nurture-JavaFE-main\ReactJS_HOL_Working_Directory'. The file explorer shows the following structure:

- blogapp
- cohorttracker (selected)
- node_modules
- public
- src
- gitignore
- package-lock.json
- package.json
- README.md
- myfirstreact
- scorecalculatorapp
- studentapp

On the right, a terminal window shows the output of the 'npm install' command. The terminal output includes various deprecation warnings and a summary of installed packages and vulnerabilities.

```
PS C:\Users\shari\OneDrive\Desktop\Digital-Nurture-JavaFE-main\ReactJS_HOL_Working_Directory\cohorttracker> npm install
ed. Please use @babel/plugin-transform-object-rest-spread instead.
npm warn deprecated inflight@1.0.6: This module is not supported, and leaks memory. Do not use it. Check out lru-cache if you want a good and tested way to coalesce async
c requests by a key value, which is much more comprehensive and powerful.
npm warn deprecated workbook-google-analytics@6.4.2: It is not compatible with newer versions of GA starting with v4, as long as you are using GAv3 it should be ok, but t
he package is not longer being maintained
npm warn deprecated @sinonjs/fake-timers@5.0.1: You or someone you depend on is using @, the JavaScript Promise library that gave JavaScript developers strong feelings about promises. They
can almost certainly migrate to the native JavaScript promise now. Thank you literally everyone for joining me in this bet against the odds. Be excellent to each other.
npm warn deprecated
npm warn deprecated (For a CapTP with native promises, see @endo/eventual-send and @endo/captp)
npm warn deprecated @humanwhodocs/object-schema@1.2.1: Use @eslint/object-schema instead
npm warn deprecated svgo@3.2.1: This SVGO version is no longer supported. Upgrade to v2.x.x.
npm warn deprecated uuid@8.3.2: uuid@8 and below is no longer supported. For ESM codebases, update to uuid@latest. For CommonJS codebases, use uuid@11 (but be aware t
his version will likely be deprecated in 2020).
npm warn deprecated eslint@8.0.0: This version is no longer supported. Please see https://eslint.org/version-support for other options.
npm warn deprecated core-js-pure@3.21.0: core-js-pure@3.23.3 is no longer maintained and not recommended for usage due to the number of issues. Because of the V8 engine
whims, feature detection in old core-js versions could cause a slowdown up to 100x even if nothing is polyfilled. Some versions have web compatibility issues. Please, upgrade u
pgrade your dependencies to the actual version of core-js-pure.

Created the CohortDetails.module.css and imported the CSS Module

The screenshot shows a VS Code editor with a ReactJS project. The file explorer on the left shows the project structure, with 'CohortDetails.module.css' selected. The main editor area shows the CSS file content. The bottom terminal shows the command 'npm install' being executed.
